

PROFILE

Dynamic, ambitious, fast learner person. Studying Computing degree and looking for an intern mostly during the summer or during university. After years working in Hospitality, I decided to change a path which I recognized was not mine, that is why I enrolled on a course. My success in the first year got me selected as a Success Coach for first year students. My passions are technology, travelling and socializing with people. I mark myself as hard-worker and I work efficiently on a team. My spare time is dedicated to learn new programming languages.
